

UNITED FACW WETLAND MIXTURE

Description: United FACW Wetland Mixture is formulated to more accurately represent species found in Zone 3 (Iowa) and Zone 5 (Nebraska) as designated by the USDA Wetland Indicator Status. FACW wetland species are found in wet soils that will occasionally dry out during summer months. United FACW Wetland Mixture is a complete mixture of native warm season grasses, native cool season grasses, wildflowers and sedges. Special emphasis of specie selection was placed on seed count per pound to minimize domination of smaller sized seeds. Dormant seeding is recommended for natural seed stratification.

Seeding Rates:

15 LBS/Acre (drill seeded)
18 LBS/ Acre (broadcast or dormant seeded)

Seeding Dates:

March– July
Mid November-February (dormant seeding)

Days to Germination:

10-30 Days as a mixture
