## Description

**United Pollinator Mixture** creates the perfect habitat to attract a diverse number of pollinators such as butterflies, bees and hummingbirds. This mixture features season-long blooming and with an array of color to attract the maximum amount of pollinators. Mixed with smaller profile native grasses to help give the mixture a more native look and feel as well as a small amount of seed oats for short term erosion control. Use this mixture in urban areas such as parks and common areas as well in larger conservation areas.
